

Oxford Engineering Ltd Environmental Policy

The senior Management of Oxford Engineering Ltd is committed to preventing pollution, protecting the environment from its business activities and minimising the impacts on the environment by effective management. The company commits to doing this by the following:

Ensuring adherence to legislation and other requirements to which the company subscribes in relation to our activities.

Identifying significant environmental aspects and addressing them through good environmental practice.

Engaging with staff and giving them the required training and supervision to support the company's environmental objectives.

Defining roles & responsibilities within the organisation structure.

Engaging with our customer and supply chain and sharing good environmental practice.

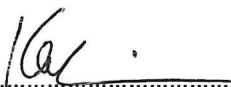

Through monitors and reviews striving to continuously improve our environmental performance & management system.

Objectives & targets have been set with regards to the above commitments, and the company will make every effort to meet or exceed them.

To ensure the company's environmental management system is of the highest quality, it has been certified to the ISO 14001 standard. Staff at all levels has responsibilities within the system and adequate equipment, resources, training, supervision & instruction will be given to enable adhere to them.

The Managing Director has the overall responsibility for all matters relating to the environment and will be involved in the review of the management system to ensure it remains current and operates within the legislative and ISO 14001 requirements.

In addition to inclusion in the employees' induction the environmental policy is displayed prominently on the Environmental notice board, our website www.oxeng.co.uk and will be made available upon request to any bona fide interested parties.
